

Finding Nemo (U8-U10)

Hide a toy figurine under one of the central cones. Players must then (simultaneously) dribble into the square, pick up one cone and bring it outside of the square. This process should be repeated until one of the players finds the cone with Nemo. The first player to find Nemo and to make it back outside of the square wins! Note: The players are to carry the cone they chose to the outside of the grid.

Variations:

1. Add a defender. If the defender kicks a player's ball before the player returns to the outside of the grid, the player must return the cone.
2. Free for all. Allow all of the players to kick each other's balls out. If a player's ball gets kicked out, they must return their cone if they had one.

Focus:

Players should focus on dribbling under control and keeping their heads up. Keep the ball close, especially when defenders are around.
